<b>B.Sc., Economics</b> , Nova School of Business and Economics	2011 - 2014

## Research Interests

---

Corporate Finance, Financial Distress & Bankruptcy, Household Finance

## Job Market Paper

---

### Capital Structure and Employee Consumption

I show that firm capital structure can affect employee consumption and saving decisions using a new matched employer-employee data set from Portugal. Specifically, employees of highly leveraged firms exhibit lower marginal propensities to consume, particularly in non-essential goods and services. This effect cannot be attributed to a wage premium in these firms. I identify these effects by exploiting negative industry-wide shocks. I rationalize the findings using a Diamond-Mortensen-Pissarides matching model, where heterogeneous risk-averse employees bargain with heterogeneous employers to determine wages. Consistent with the model, low-wealth individuals are most affected due to their relatively higher unemployment costs. My results suggest that financial distress costs are partially shifted to employees.

Presentations: CEPR 10th European Workshop on Household Finance, Copenhagen, Denmark 2025 | 2nd Lapland Household Finance Summit, Levi, Finland 2025 | Portuguese Around the World: Central Banking Edition, Lisbon, Portugal 2024 | AFA PhD Student Poster Session, San Francisco, CA 2025 | Nova SBE Finance PhD Final Countdown, Lisbon, Portugal 2024 | Nova SBE Faculty Seminar, Lisbon, Portugal 2024
