Education

Ph.D., Economics & Finance , Nova School of Business and Economics	2019 - Present
Visiting Ph.D. Student at Carnegie Mellon University (Spring 2023)	
Summer School in Structural Estimation (Corporate Finance), Mitsui Center	August 2021
M.Sc., Finance , Nova School of Business and Economics	2014 - 2016
B.Sc., Economics , Nova School of Business and Economics	2011 - 2014

Research Interests

Corporate Finance, Financial Distress & Bankruptcy, Household Finance

Job Market Paper

Homemade Unleverage: Do Households Care About Employers' Leverage?

Exploiting a rich dataset of matched households and employers, I provide novel evidence on the impact of the employer's capital structure on employees' consumption and saving decisions. Despite receiving lower wages, households working for highly leveraged employers exhibit lower marginal propensities to consume. This effect is driven by cutting in “luxury” goods and services, thus suggesting a novel channel through which financial distress costs spill over to other—potentially unrelated—firms: the employee-spending channel. To establish causality, I look at employees' responses to negative industry-wide shocks and find that only those employed by high-leverage firms cut consumption, though I find no differential effect on

wages. I reconcile these facts with a Diamond-Mortensen-Pissarides matching model, in which heterogeneous risk-averse employees bargain with heterogeneous employers to determine wages. Consistent with the model, the consumption response is mainly driven by poorer households, for whom unemployment is more painful. Overall, evidence is suggestive that financial distress costs are being partially shifted to employees.
