B.Sc., Economics, Nova School of Business and Economics	2011 - 2014

#### Research Interests

Corporate Finance, Financial Distress & Bankruptcy, Household Finance

## Job Market Paper

#### Capital Structure and Employee Consumption

I show that firm capital structure can affect employee consumption and saving decisions using a new matched employer-employee data set from Portugal. Specifically, employees of highly leveraged firms exhibit lower marginal propensities to consume, particularly in non-essential goods and services. This effect cannot be attributed to a wage premium in these firms. I identify these effects by exploiting negative industry-wide shocks. I rationalize the findings using a Diamond-Mortensen-Pissarides matching model, where heterogeneous risk-averse employees bargain with heterogeneous employers to determine wages. Consistent with the model, low-wealth individuals are most affected due to their relatively higher unemployment costs. My results suggest that financial distress costs are partially shifted to employees.

Presentations: AFA PhD Student Poster Session, San Francisco, CA 2025; Nova SBE Finance PhD Final Countdown, Lisbon 2024; Nova SBE Faculty Seminar, Lisbon 2024

### Working Papers
